As a system administrator, you need to have administrative rights to install or remove an extension from a Web Application. Extension for all versions of WebMatrix. the studies referenced in the text. Studies conducted by other authors were also reviewed. We initially hypothesized that women would prefer and engage in more resistance training than men, but we are aware of no other review that addressed this hypothesis. Our original search terms were resistance training, exercise, and women, but we did not find any studies that used these terms. We re-examined our literature search to ensure that none of the studies we reviewed addressed this hypothesis. If gender differences exist for the response to resistance training, the differences may be partly due to biological factors. In general 82157476af
